H-NET™ NETWORKS

On January 8, 2008 the Company released its new H-NET™6.0 MeterSystem to manufacturing for commercial deployment. Read more [CNES Memo](#)

Santa Clarita California - The Company approved a retrofit project replacing its existing network hardware with new H-NET™6.0 BaseStation and MeterSystems. In addition we anticipate adding more residential and commercial meters increasing network size, coverage and presents within that municipality.

C-NEST™ NETWORKS

Live Meter Data displays are now available from the ConectiSys Network Operations Center. Our new meter PHP based displays feature consumption, trends and costing information for energy consumers. Follow the link [Meter Data](#), then press the login button to view our new user friendly Meter Data Displays. Follow the instructions in the header of each table or chart within the frame. Note, this is a work in progress and some functions or links may not be available. Please feel free to leave a comment to our network administrator in the ConectiSys website forum.

C-NEST™ MARKETING

From the desk of Rod Lighthipe ...

As we start the New Year, I want to reflect on the past year briefly and establish the Company's goals for 2008.

H-NET™6.0 (both hardware and software) was completed in the fall of 2007.

The hardware was a revision from a previous three board design to a single board with a state of the art high powered radio at a lower production cost.

The H-NET™ 6.0 software was simplified resulting in accelerated network configuration.

The BaseStation went through significant cost reduction modifications. These changes include new functionality such as self diagnostic and redundant network communications which enables more flexibility for BaseStation and MeterSystem deployment. In summary, in 2007 we reduced the cost of our H-NET™ product line and accomplished greater overall system reliability.

That being said ... 2008 is upon us and the focus at ConectiSys has changed.

As they say in real estate ... location, location, location. Well, at CNES this year it will be marketing, marketing, marketing.

This year will include a presence at AMR exhibitions, utility conferences and wherever else we can proudly display our product. We will also be at major meter manufacturers with our mobile H-NET™ Network demonstration system.

We are currently negotiation joint marketing agreements with multiple Meter Service Providers in different geographic areas of the

United States. Yes, 2008 will be the year of marketing at CNES.

As always, be assured that we are constantly working to enhance shareholder value. For now, stay warm this winter. Be safe on the slopes and I will talk with you next month.

Regards,
Rod Lighthipe
Director of Business Development

An Insider's View of PG&E's IT Transformation by Toby Tyler, Pacific Gas and Electric Co.

Pacific Gas and Electric Company (PG&E), headquartered in San Francisco, is one of the largest combination natural gas and electric utilities in the United States. Approximately 20,000 employees carry out our primary business—the transmission and delivery of energy. Founded in 1905, PG&E serves 15 million people throughout a 70,000-square-mile service area in northern and central California. Yet even a company like PG&E with more than a century of tradition is not afraid to transform and change.
