Volume 2008

October 28, 2008

**H-NET™
NETWORKS**

Product

As previously stated H-Net 6.0 is past development stages and has gone through cost reduction, extensive testing and built up a project ready inventory. This places the company in a unique position to enter contracts with no development cost. For more information regarding ConectiSys Corporation's H-Net 6.0 meter reading system and services visit www.conectisys.com.

**C-NEST™
NETWORKS**

The Move/ Overhead

In the last two months the majority of the company's resources have been occupied with restructuring and a recent move of our Network Operations and Sales office. These actions have taken place to sustain the overall health and dramatically reduce overhead for the company.

Phones/ contact

The main phone number for the company has changed. Please call 661-750-4621 at ext. 204 for all investor related inquiries. This number change is due to the company's decision to switch from standard phone lines to voice over IP technology.

**C-NEST™
MARKETING**

Marketing

The ConectiSys marketing plan is in effect. This marketing effort includes direct mail campaigns, phone and e-mail campaigns, online marketing, conferences, internet promoting and networking.

This marks the start of a long term industry awareness campaign to expose H-Net on many levels.

All resource will be placed strategically to accommodate the company's marketing needs. With the product being fully tested and ready for market, the company is ready for any available jobs.

When a potential client is identified the process begins with product demonstration at installation with one caveat "client approval". The second milestone is to parlay off the demonstration proposal into contractual release. At this juncture, deployment agreements are met. This is accomplished by using the installed demonstration hardware and adding more plug and play meters forming a larger AMR network with hundreds or thousands of meters limited only by the size of the respective energy cooperative or energy provider's customer base. Take a look at our [Demonstration Proposal Template](#) and [Marketing Brochures](#) for more information on this very important subject.

Corporate Governance

The company has completed a reverse split. ConectiSys stock is now trading under CONC. The reversal came about due to the difficulties in financial investments and overall state of the economy which has affected many markets including the energy sector.

The Company path for 2008 and beyond is marketing for sales. Achieving this goal will start with a single commercial contract and successful release of a minimum of fifty to one hundred MeterSystems to include future releases resulting in a significant AMR network that the utility industry at large will begin to take notice.

Our first commercial release will form the basis for market penetration; with two or more such contracts the opportunity will be vertical.

Current contract opportunities are on the table.

Safe Harbor Statement under the Private Securities Litigation Reform Act of 1995: The statements contained herein and in the Monthly Report that are not historical are forward-looking statements that are subject to risks and uncertainties that could cause actual results to differ materially from those expressed in the forward-looking statements including, but not limited to: the level of cost-effectiveness and efficiency of the Company's H-Net™ automatic meter reading products or technologies; changes in the Company's policies regarding communications with shareholders and the general public; the success or failure of the Company's marketing efforts and the particular efforts to be employed; the Company's ability or inability to commercialize, sell, license or further develop its H-Net™ automatic meter reading products or technologies; and other risks detailed from time to time in the Company's periodic reports and other filings with the Securities and Exchange Commission.
