CONNECTISYS CORPORATION ANNOUNCES ENHANCED CONSERVATION DISPLAYS ON ITS WEBSITE

Valencia, California: Wednesday, January 23, 2008, ConectiSys Corporation (OTCBB:CNES), a developer of automatic meter reading technologies and associated wireless products for the energy markets, announced today the launch of a major conservation oriented website enhancement for its core technology, H-NET™, an electric meter reading wireless network.

This new capability is a result of a significant revision to the Meter Data portion of the Company's existing website, www.Conectisys.com. This revision enables conservation minded customers, to select the Meter Data Tab, to view electric consumption data on a real time basis in the following user friendly formats; (1) hourly usage throughout the day, (2) day to day comparisons throughout the month, (3) month to month comparisons throughout the year and (4) year to year comparisons over a three year period. The most significant capability of this revision is the enabling of customers to view a forecast of their current monthly bill. ConectiSys will incorporate in each customer data display the rate schedules for their electric energy provider. The customer, by selecting the "My Energy Costs" button under the Meter Data Tab, will be able to view a projected cost of their current billing cycle, based upon the most recent usage trend.

Rod Lighthipe, ConectiSys Director of Business Development, summarized this recent revision of the Meter Data Displays by commenting, "The Company has provided the first internet based data displays that will allow customers to monitor and plan electric energy usage and at the same time control their costs. This customer awareness will directly contribute to energy conservation and address the concerns about global climate change." Lighthipe concluded by remarking "The Company prides itself in its ability to provide the customer control over their budget and concurrently contribute to an urgent need to conserve our valuable natural resources."

Robert Spigno, ConectiSys CEO and President, stated "The combination of these new Meter Data Displays and our current marketing campaign will further enable the Company to meet its revenue goals for 2008."

Safe Harbor Statement under the Private Securities Litigation Reform Act of 1995: The statements contained herein and in the Monthly Report that are not historical are forward-looking statements that are subject to risks and uncertainties that could cause actual results to differ materially from those expressed in the forward-looking statements including, but not limited to: the level of cost-effectiveness and efficiency of the Company's H-Net™ automatic meter reading products or technologies; changes in the Company's policies regarding communications with shareholders and the general public; the success or failure of the Company's marketing efforts and the particular efforts to be employed; the Company's ability or inability to commercialize, sell, license or further develop its H-Net™ automatic meter reading products or technologies; and other risks detailed from time to time in the Company's periodic reports and other filings with the Securities and Exchange Commission.
